

Environmental Policy

The Lack Group of Companies management and employees are committed to conducting our business in an environmentally responsible manner and effectively identifying and managing any risks which may potentially impact the environment.

We are committed to achieving a positive impact on the environment and improving environmental sustainability for the services that we provide.

We will continuing to provide safe and efficient systems that minimise environmental impacts with continual improvement of our environment performance.

When conducting our activities, we shall:

- pro-actively seek to identify potential environmental hazards so that we may implement controls to remove or manage the significant hazards prior to work commencing,
- ensure the prevention of pollution from our activities, and
- comply with relevant legislation and other requirements applicable to our significant hazards.

We shall continuously improve our environmental performance by ensuring that we:

- establish measurable objectives and targets to promote improved environmental performance and to reduce environmental harm, and
- report and investigate all environmental accidents, incidents and concerns, and take appropriate follow-up action.

To ensure this policy is effective we shall:

- ensure that staff conducting activities with potentially significant environmental impacts are trained and competent to conduct those activities,
- provide adequate time and resources to manage and perform tasks in an environmentally responsible manner, and
- review this policy annually in consultation with Managers, Employees and other interested parties for suitability and adequacy for the companies.
